

St. Anthony will be forming a Vex IQ Robotics team and will be made up of boys and girls in grades 3 - 6. We can only accommodate 10-15 students and preference will be given to the older students if we have too many interested children.

VEX IQ is a robotics platform using an easy snap together and tool-less system, children are able to design and program robots quickly to perform specific challenges. Children will not only learn how to make robots work but also learn how to work with others and develop problem-solving skills they need for life.

Students will work in teams of 2-3 and each team will have exclusive use of a VEX IQ kit and be given the opportunity to participate in area competitions.

**WHO: BOYS AND GIRLS - GRADES 3 - 6**  
**WHEN: MONDAYS, starts Nov. 27-approx. 10 weeks**  
**TIME: 2:30 - 4:00**
